

# YOUR SOURCE FOR ELITE ICE CUSTOM BUILT ALUMINUM FISH HOUSES

*If you take your Ice Fishing seriously, check this out:*

Custom built aluminum fish houses from Elite Ice have proven themselves to be strides ahead of the entire industry in both quality and innovation. While not the lowest price units, you will simply not find a better value available...at any price. My experience with the so-called better brands prove they simply don't compare. Elite Ice's design is state-of-the-art and the detail and workmanship are impeccable. All materials and components used are the very best available. Of particular note is the all-aluminum construction. Combining strength and rigidity with light weight and years of service-while remaining great looking. These are unquestionably dream ice houses and can be customized in any fashion you want or can imagine. As an independent representative of Elite Ice custom built aluminum fish houses, I can offer all models at Factory Direct Pricing. These units are unquestionably the envy of the industry and if you have not had the opportunity to see one first hand, you owe it to yourself to do so.

## Fish Houses

I am blessed to be heavily involved in the Outdoor Industry and this has afforded me the unique opportunity to have been exposed to and used the finest of every form of equipment available. Therefore, I have firsthand knowledge of what is good, better, and best. I have acquired a distinct taste for using only the cream of the crop and when that comes to the latest and greatest in Ice House/RV/Toy Hauler combinations that recently have become vogue – Elite Ice Custom Built

Aluminum Fish Houses have earned my respect and endorsement. You will simply not find a better value available...at any price. Believe me as I have run the so called "better brands" and although appearing functional on the surface, they simply do not compare. The detail of Elite Ice's custom built aluminum fish house's is immaculate and the materials and workmanship are impeccable. These are truly your "Dream Ice Houses" and can be customized in any fashion, size, or configuration you want or can imagine.

The model I have found to fit my personal needs the best is what is referred to as a "Tracker." It is a 7 foot model uniquely exclusive to Elite Ice with the wheels purposely designed to follow directly in your pickup tracks. No longer having the house plow its own track greatly reduces the likelihood of getting stuck. This vastly increases mobility and usefulness in heavy snow conditions. This can be had in 14 or 16 foot versions. I prefer the 14 footer as it further reduces weight and easily maneuvers less than ideal ramps and travel conditions where standard wheeled houses simply cannot go.

These units are truly exquisite. If you have not had the opportunity to see one first hand, you owe it to yourself to do so. They are unique in that they are constructed of all aluminum building materials and will literally provide you with a lifetime of use. These are not mass produced for economy. Each unit is handcrafted and painstakingly CAD designed for the discerning angler. An appreciated feature is an effortless electric lift system. The real beauty of these thoughtfully designed units is that they can be used for so much more than just Ice Fishing. Many folks employ them as Toy Haulers (Cycles, ATV's, or Snowmobiles easily slide out of the units equipped with a ramp door and you now have a fully functional camper to return to after the day's activities).

The amount of uses is literally only limited by your imagination. This helps to make them a much better value than just purchasing a separate Ice Shack or a Toy Hauler, or Camper for that matter. Why not have all 3 for the price of 1? This will no doubt help to satisfy the sensibilities of the Spouse or Banker (maybe one in the same in your house).

Elite Ice can provide everything from economical shells to more elaborate completely finished and ready to fish units. If you are seriously considering moving up to the finest fish houses on the market, it can even be arranged for you to spend a day on the ice with us and experience first-hand what we are talking about...and catch some fish in the process!
